American Journal of Public Health

www.ajph.org

Promoting public health research, policy, practice, and education is the mission of the American Journal of Public Health. As we widen our scope to embrace global issues, we also sharpen our focus to support the needs of public health practitioners. We invite contributions of original unpublished research, opinion and commentary, departments, and letters to the editor.

The Journal is printed on acid-free recycled paper.

Cover. In the Foreword to the book, The Quest for Health Reform: A Satirical History, by Georges C. Benjamin, Theodore M. Brown, Susan Ladwig, and Elyse Berkman (APHA, 2013, p. iii), Editorial Cartoonist Clay Bennett of the Chattanooga Times Free Press explains: "Fair and impartial journalism will always have a special place in my heart . . . just not in my work. If the role of a journalist is to hold up a mirror to society, the mirror an editorial cartoonist uses is like the ones you find in a carnival funhouse: a mirror that's warped by our own perspective and one that reflects an image distorted by our own biases. You see, unlike most journalists, we cartoonists aren't held to the same standards of objectivity and impartiality. One part reporter and one part advocate, an editorial cartoonist isn't merely an observer of the public debate, but an active participant in it, as well. As such, I'm expected to present a point of view: to depict the world as I see it, and to campaign for a world I would like to see."

Cover concept and selection by Aleisha Kropf. Matt Wuerker Editorial Cartoon used with the permission of Matt Wuerker and the Cartoonist Group. All rights reserved.

Strabismus in Craniosynostosis

Clonidine Premedication Versus Placebo: Effects on Postoperative Agitation and Recovery Time in Children Undergoing Strabismus Surgery

Determinants of Ocular Deviation in Esotropic Subjects Under General Anesthesia

Changes in Sagging Extraocular Muscle Following Surgical Recession of the Superior Rectus Muscle in Rabbit Eyes

Incidence of Retinal Hemorrhages in Abusive Head Trauma

Eye to Eye: Management of a Nasolacrimal Duct Fistula
Review Article

140 Strabismus in Craniosynostosis
Jamie B. Rosenberg, Oren M. Tepper, Norman B. Medow
This article reviews the epidemiology of strabismus in craniosynostosis and options for surgical treatment of the often complex ocular misalignment in these disorders.

Original Articles

150 Clonidine Premedication Versus Placebo: Effects on Postoperative Agitation and Recovery Time in Children Undergoing Strabismus Surgery
Laura J. Heinmiller, Leonard B. Nelson, Marc B. Goldberg, Adam R. Thode
Children receiving clonidine prior to undergoing strabismus surgery have a small but noticeable reduction in postoperative agitation, stay slightly longer in the post-anesthesia care unit, and have higher rates of parent satisfaction.

155 Determinants of Ocular Deviation in Esotropic Subjects Under General Anesthesia
Vincent Daen, Chloé Turpin, François Lignereux, Riad Elghobashi, Guylene Le Meur, Pierre Lebranchu, Alain Pechereau
The authors observed that preoperative ocular deviation and patient age were the main factors that influenced the ocular position under general anesthesia.

162 Changes in Sagging Extraocular Muscle Following Surgical Recession of the Superior Rectus Muscle in Rabbit Eyes
Won Yeoil Ryu, Jeong Bum Bae
Overcorrection that occurred in cases of central muscle sag in the rabbit models resulted from posterior migration of recessed muscle that occurred in conjunction with slippage of its nasal and temporal edges.

169 Incidence of Retinal Hemorrhages in Abusive Head Trauma
Majida A. Gaffar, Debra Esernio-Jenssen, Sylvia R. Kodosi
The authors evaluated whether a relationship exists between the presence of retinal hemorrhages and confessions and/or identified perpetrators in cases of abusive head trauma.
174 Differentiation in Retinoblastoma and Histopathological Risk Factors in Mexico
Ricardo Gómez-Martinez, María Elena Rosales-Gradilla, Noemí Silva-Padilla, Adrián Corona-Macias
Histopathological risk factors were present in 36% of eyes. Moderately differentiated tumors occurred at advanced ages and were more frequently associated with histopathological risk factors.

178 Visual Outcome and Changes in Corneal Endothelial Cell Density Following Aphakic Iris-Fixated Intraocular Lens Implantation in Pediatric Eyes With Subluxated Lenses
Sorath Noorani Siddiqui, Ayesha Khan
Artisan aphakic intraocular lens implantation is a safe surgical choice in the management of ectopia lentis with minimal complications and is less traumatic to pediatric eyes.

184 Calibration and Validation of Nine Objective Vision Screeners With Contact Lens-Induced Anisometropia
Robert W. Arnold, Bethanne Davis, Laura E. Arnold, Kayla S. Rowe, Jodi M. Davis
The authors reviewed nine objective screeners and all appeared valid for detection of anisometropia.
