INVITED REVIEW
Tooth discoloration induced by endodontic materials: a literature review

MINI REVIEW
Oral self-injury. An update

ORIGINAL ARTICLES
Histological and immunohistochemical analyses of the chronology of healing process after immediate tooth replantation in incisor rat teeth
Flexural properties and shock-absorbing capabilities of new face guard materials reinforced with fiberglass cloth
Regenerative capability of dental pulp cells after crown fracture
Evaluation of the anti-resorptive ability of an experimental acetazolamide paste for the treatment of late replanted teeth: a study in rats
Detection of vertical root fractures by conventional radiographic examination and cone beam computed tomography – an in vitro analysis

The effects of mouthguards on the athletic ability of professional golfers
Traumatic dental injury among 12-year-old South Brazilian schoolchildren: prevalence, severity, and risk indicators
Storage media enhance osteoclastogenic potential of human periodontal ligament cells via RANKL-independent signaling
Radiological evaluation of single implants in maxillary anterior sites with special emphasis on their relation to adjacent teeth – a 3-year follow-up study
Influence of calcium hydroxide intracanal medication on bond strength of two endodontic resin-based sealers assessed by micropush-out test
