Promoting public health research, policy, practice, and education is the mission of the American Journal of Public Health. As we widen our scope to embrace global issues, we also sharpen our focus to support the needs of public health practitioners. We invite contributions of original unpublished research, opinion and commentary, departments, and letters to the editor.

The Journal is printed on acid-free recycled paper.

Cover. Our cover this month features Lauryn Money of the Dorchester section of Boston, MA, in the crowd outside the Cathedral of the Holy Cross where President Obama spoke on April 18, 2013, at an interfaith service to honor the victims of the Boston Marathon bombing (3 people died and at least 180 others were injured from the 2 bomb blasts). As public health enthusiasts from around the world gather in this great city on November 2-6, 2013, for the American Public Health Association 141st Annual Meeting & Exposition, we stand strong with Boston.

Cover: On the cover of this issue devoted to The Health of Sexual Minorities, Jennifer Villasana, President of the Richland High School Gay-Straight Alliance, holds a badge she wore during the White House LGBT (Lesbian, Gay, Bisexual, Transgender) Conference on Safe Schools and Communities at The University of Texas at Arlington on March 20, 2012. In this issue, Ilan Meyer and Ronald Bayer argue that—both legally and ethically—there is great leeway for schools to implement gay-affirmative interventions. Still, they recommend that interventionists embrace community-based participatory research principles, toward ensuring better community uptake and achieving meaningful intervention success (p. 1764–1771).

Original Articles

268  Analysis of Risk Factors for Consecutive Exotropia and Review of the Literature
Nazife Sefi Yurdakol, Seyda Ugurlu
Anisometropia, amblyopia, asymmetric surgery, and postoperative adduction deficit were associated with the development of consecutive exotropia.

274  Surgical Results of Consecutive Exotropia
Zhale Rajavi, Mohadesheh Feizi, Hoosein Mughadasifar, Mehdi Yaseri, Narges Haftabadi, Kourosh Sheibani
The authors examine the success rates of different surgical procedures and the risk factors of surgical failure among patients with consecutive exotropia.

282  Ultra-Widefield Imaging for the Management of Pediatric Retinal Diseases
Kai B. Kong, Matthew M. Wessel, Jianping Tong, Donald J. D'Amico, R. V. Paul Chan
Ultra-widefield fundus photography and fluorescein angiography can be used successfully as an outpatient procedure in the pediatric patient population without the necessity of examination under anesthesia and can aid the physician in the documentation and evaluation of peripheral retinal pathology.

290  A Prospective Comparison Between Cyclopentolate Spray and Drops in Pediatric Outpatients
Marina Syrini, Sophie M. Jones, Graham M. Thompson
The authors found that cyclopentolate 1% spray is less distressing at the time of administration than cyclopentolate 1% drops for children 7 years or younger.

296  Retinoblastoma in Turkey: Results From a Tertiary Care Center in Ankara
Kaan Gündüz, Kenan Köse, Rengin Aslıhan Kurt, Elcin Süren, Nurdan Taşçıldız, Handan Dinççaslan, Emel Ünal, Esra Erden, Aylin Okçu Heper
The authors evaluated the presentation patterns and results of management of retinoblastoma at a tertiary care center in Turkey, with special emphasis on globe conservation rate in unilateral and bilateral intraocular retinoblastoma.

304  Corneal Topography and Corneal Thickness in Children
Shaileja P. Reddy, Rasheena Bansal, Pravin K. Vaddavalli
The authors' results provide normal standards for elevation and curvature topography and corneal thickness in children that may prove useful as a reference for future comparative studies of different corneal diseases in children.
Bilateral Pediatric Cataract Surgery: Outcomes of 390 Children From Nepal and Northern India
Albrecht Hennig, Bernd Schroeder, Clare Gilbert

Even in a setting with limited resources, successful, cost-effective, high-volume surgery for pediatric cataract is possible.
